Quick installation guide for DJ4 in Traktor Pro 2

- connect the DJ4 via USB to your computer (connection via a USB-hub is possible too)
- start Traktor Pro 2 version 2.10 or higher (please update if you have a lower version)
- open Traktor's preferences and select the tab 'Controller-Manager'
- download and decompress the template file from DJ4 product site <u>http://www.faderfox.de/settings/faderfox%20DJ4%20Traktor.zip</u>
- (1) import the setup file (TSI-file in folder DJ4) by clicking the Add-button
- (2) check the correct name of the new device 'Faderfox DJ4 Vxx TP2.....'
- be sure to have only one instance of DJ4 device in your device list to avoid some strange behaviour
- (3) activate the midi ports 'Faderfox DJ4' for this device (mostly done automatically)
- sync the controller to Traktor by pressing both red deck keys (mostly done automatically)
